Re: Letter of Recommendation

To whom it may concern,

Petersen-Dean Roofing Systems contracted MicroTech Systems in the spring of 2006 to assist with the technology transition of a company we had recently purchased in Stuart, Florida. We found it necessary to work with a local firm since our company's in-house IT department is based in California. During the initial transition process, we developed an excellent working relationship with MicroTech and based on that began using them to support our other Florida operations.

In 2006 and 2007, the company experienced a large amount of growth in the Florida region. As our needs grew, MicroTech handled the majority on-site IT work involved in opening a large divisional office in Palm City as well as a regional office located in Orlando. They were able to handle all aspects of the project from the initial data cabling needs all the way through server and desktop deployment as well as the support needed afterwards. In addition to these larger projects, they coordinate with our IT department to handle the majority of our on going day-to-day support needs for our Palm City, Pompano, Orlando and West Palm Beach offices.

I have personally worked with Bryan Gardner and his staff on the majority of the projects mentioned and feel comfortable recommending his firm to others. If you have any questions, please feel free to contact me at 561-721-9921, extension 377.

Sincerely,

James Vander Biezen
Controller

Petersen Dean Roofing and Solar Systems - Florida
